ACOUSTICS

Acoustic Panels
for Walls & Ceilings

We are Décor Acoustics

**Specialist manufacturers of
certified acoustic panels for
ceilings and walls.**

We help contractors and architects manage building sound through the design and specification of the acoustic finish precisely tailored to their project. We do it quickly too, with support every step of the way, from plans to installation.

Our mission

Our mission is to deliver frictionless and fast end-to-end project support for contractors and architects from design and specification through to manufacture and install.

We do this through inspiring materials for design, easy access to essential technical information, fast provision of accurate estimates, custom panel design and manufacture and on-site support at install.

Why choose Décor Acoustics?

We look closer

No matter how big the project it's the small details that make the difference. Which is why we work to deliver the fullest information possible at every stage to ensure specs are complete, pricing accurate, delivery on-time and install simple.

We go further

We value our working relationships and will always go the extra mile at every step of the project to earn trust and respect for a great job well done. We understand that we have to earn the right to win business and we take nothing for granted.

We move faster

To win contracts and deliver projects effective coordination is everything because full-project timing rests wholly on the timing of its parts.

From concept to delivery we ensure we understand the pace required to deliver what is needed exactly when its needed.

18

What we do

Design & specification

From the outset of any project we help you plan your project with access to the resource and support you need from samples and images to initial quotes and detailed surveys.

Manufacture

Our wood and real-wood veneer panels are manufactured in our UK factory ready for delivery direct to your site.

Install support

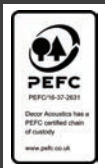

Our team work with you for the duration of the project to ensure smooth installation and completion.
